SECURITY LEVELS

Not all of them offer the security needed and we can only find heavy and bulky locks.

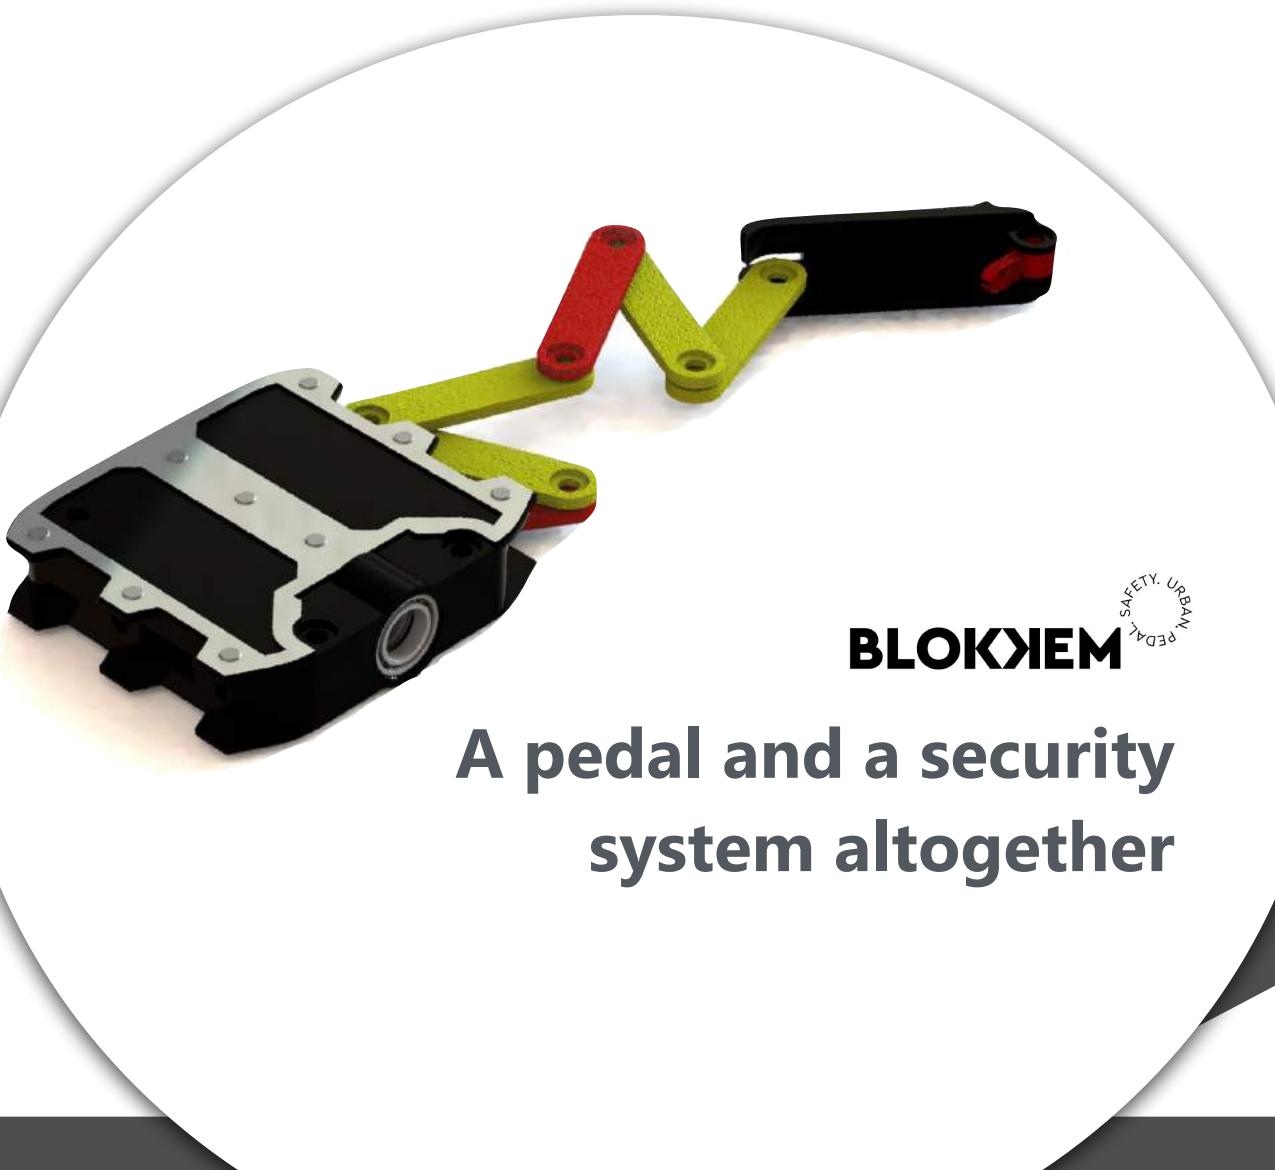

NO SO USEFUL

These locks are not comfortable for the user and only cover this need partially.

Blokkem the ultimate solution

A pedal and a security system altogether

Built-in or accessory

This solution can be integrated at the manufacturing process or as an accessory for bikes already in the market.

Safe
High security chain system.

100% integrated
Integrated in the bike as one of its parts, made for users confort.

Customizable

Using this patented design as a base product, it can be adjusted and personalised.

All senses security, only two steps to lock your bike. Extend the chain and bring it around to lock it back to the pedal.

Key  or numeric lock  available, both options patented.
